

## Savings Highlight

-In 5 years: ₦60M (generator) – ₦25M (solar) = ₦35M saved.

- In 10 years: Generator = ₦120M+, Solar ≈ ₦35M

**Solar saves the church over ₦80M in 10 years.**

## Key Point for Management:

Investing ₦25M in solar is not an expense but an asset. It eliminates unreliable PHCN power and the heavy financial burden of generator fuel. The church saves tens of millions while positioning itself as a forward-thinking, sustainable leader.
